

## **VOICE STRESS ANALYSIS TRAINING COURSE**

**\*\*\*DATE CHANGE\*\*\***

The Carbondale Police Department is sponsoring and hosting a 5-day DIGITAL VOICE STRESS ANALYSIS forensic detection-of-deception (Lie Detection) training class from **October 15, 2012 through October 19, 2012**. The class will be held at the Carbondale Police Department located at 501 S. Washington Street in Carbondale, IL. Many Illinois law enforcement agencies and others throughout the US are successfully utilizing DVSA. This was the first VSA system to be approved for use in Illinois by the ILESTB.

**Participating agencies will be provided with FREE Digital Voice Stress Analysis™© (DVSA) v5.0.1 computer software and end user license.**

**Graduates will be capable of conducting truth verification / credibility assessment examinations with ease concerning criminal matters, witnesses, victims, intelligence, counterintelligence, civilian pre-employment and selection in Illinois.**

DVSA™© software is provided through Criminal Justice grants from the developer. You save \$9950 on each VSA system through this grant. Your only cost is initial training tuition for each examiner at \$1500 and re-certification training of \$300 annually thereafter. Partial training tuition reimbursement may be available from ILETSB.

DVSA™© software is installed into your department's existing laptop computer saving precious resources. Laptop operating systems must be XP or Vista. Voice Stress Analysis has been instrumental in the solving of a long list of real cases in Illinois and worldwide. It outperforms all other detection of deception methods. This new and advanced DVSA™© is the most effective investigative tool to be introduced into the law enforcement community since the invention of polygraph. DVSA v5.0.1™© is far superior to outdated VSA systems and polygraph.

DVSA™© requires no attachments to the subject being tested. DVSA™© uses only a microphone and computer to capture and display the subject's verbal responses. Questions are displayed on-screen during testing. As the subject speaks, the computer instantly records and displays the verbalizations. After complicated algorithmic calculations and filtering, the derived voice pattern is numbered, saved, and shown on-screen for examiner analysis, and chart printing. The report is written in the background saving valuable time. Optional Voice Spectrograph mode assists in voice identification.

501 South Washington Street, Carbondale, Illinois 62901

Drugs, alcohol, and health do not affect DVSA™©. There are no known countermeasures. "Inconclusive" results associated with outdated polygraph are not applicable to DVSA™©. Multi-word and narrative statements may be easily analyzed for truthfulness, both in-person or via audio recordings. Cold cases are easily resurrected by analyzing old interview recordings.

**E. Gary Baker**, DVSA™© developer and course instructor, has practiced VSA since 1974 and polygraph since 1984. His DVSA software and training program was the first VSA system to be certified by the ILETSB. Numerous Illinois law enforcement agencies utilize DVSA. He has conducted over 10,000 examinations. Baker protocols have been accepted by the U.S. Nuclear Regulatory Commission for vetting nuclear power station applicants. He introduced VSA techniques into the US / Colombia anti-terrorism and war on drugs. Baker has instructed students using a wide array of truth verification systems and techniques including outdated analog CVSA®, Diogenes, PSE, and polygraph.

Baker also instructed analysts and engineers of the Air Force Research Laboratory - Law Enforcement Analysis Facility, N.I.J - National Law Enforcement and Corrections Technology Center and at Sandia National Laboratories where most of the U.S. nuclear arsenal is developed. DVSA™© has been used in foreign theatres for vetting locals and third country nationals for sensitive and high security positions and by many foreign governments.

**RESTRICTED ATTENDANCE:** Participants must be law enforcement or security investigators, arson investigators, District Attorney / State Prosecutor Investigators, State regulatory agency investigators, or government agents. Attendees should have prior training in interview & interrogation.

***To register or to find out more about this training opportunity, contact:***

Chief Jody O'Guinn, Carbondale Police Department, (618) 457-3200, or contact **E. Gary Baker, Ph.D.**, Baker Group-International, (888) 666-0320 or E-mail: [bakergroupint@cs.com](mailto:bakergroupint@cs.com). See **[www.BakerDVSA.com](http://www.BakerDVSA.com)** for references, additional features and benefits.

We request that tuition payments be received at least two weeks prior to the class. Invoices provided upon request.
